

Celebration of Independence Day

The students of the Centre for Studies in Geography organized a unique Independence Day celebration by taking eco-conscious initiative and responsibility for cleaning the Dibrugarh University campus. This initiative was not only symbolic of their love for the nation but also reflected their dedication to preserving the natural beauty of the campus. Dedicated students joined forces to clean the campus after the official Independence Day celebrations, emphasizing their commitment to maintaining a clean and green environment.

Approximately 80 enthusiastic students actively participated in the cleaning drive. They arrived early in the morning, armed with cleaning tools and a strong sense of civic duty. After the official Independence Day celebrations concluded at the university, the students of geography promptly shifted their focus towards cleaning up the mess left behind. This included picking up litter, disposing of waste properly, and restoring the campus to its pristine condition. With 80 dedicated participants, they demonstrated that small acts of responsibility can collectively lead to significant positive change. This initiative serves as an inspiration for others to follow suit and contribute to the betterment of our surroundings.
